Subj: ELECTRONIC RECORD BOOK; ACKNOWLEDGEMENT

Your "Onelog" has been reviewed and is hereby given an acknowledgment of assessment for general compliance with MEPC.312(74). We have reviewed the materials you have submitted with your email(s) dated August 17, 2023, requesting acknowledgement for compliance of your Onelog Logbook. The documentation, as well as the product demonstrations conducted on September 19, 2023 and November 15, 2023 with my staff has sufficiently demonstrated compliance with guidelines outlined within NVIC 01-23.

However, it is important to note that this acknowledgment by the Coast Guard is the first of a two-part approach outlined within NVIC 01-23 for utilization of an electronic record book onboard a U.S. flagged vessel. In order for your product to meet MARPOL requirements onboard a U.S. flagged vessel, ship owners and operators must obtain a "Declaration of MARPOL Electronic Record Book" from the Authorized Classification Society (ACS) that issued the applicable IMO certifications. Further details for U.S. flagged ship owners and operators seeking to use your acknowledged product is outlined within NVIC 01-23, paragraph 6.c.

Your product is also now listed on the Coast Guard's website (dco.uscg.mil/Portals/9/DCO Documents/5p/5ps/Design and Engineering Standards/List of ERBs acknowledged updated.pdf). Any changes or alternation of components may require a product to undergo additional verifications.

This letter was delivered electronically to mnm@weilbach.com. No hard copies will be provided. You are welcome to print as many copies as you wish. If you have any follow-up to this acknowledgement, please feel free to contact this office at the email address or phone number above or at **CGENG@uscg.mil**. Please reference ID#: P-2023-3684 in any correspondence related to this project.

Sincerely,

STROM.FRANK.ALDEN.III.1270395321
