CT-Secure₄₆₀

Cyber Secure
Data Delivery

CT-SECURE₄₆₀

- Secure data transfer between ship and shore
- Permanent access to the latest AVCS updates
- Fully IEC61162-460 Compliant Network Node
- Transfer AVCS data to your ECDIS, without the use of a USB drive
- 4-way physical network segregation
- Built in network monitoring
- Your answer to the new Cyber Security requirements set forth by the IMO
- DNV-GL certified

With the CT-SECURE₄₆₀, USB drives become a thing of the past. As defined in the new Cyber Security risk management resolutions, shipping companies are subject to meet steep cyber security requirements, among which eliminating the use of removable media.

Through the use of the CT-SECURE₄₆₀, which is fully compliant with IEC61162-460, your ECDIS can now securely retrieve its chart data without having to transfer any files via USB sticks or even DVD's.

CT-SECURE₄₆₀

- High end networking capacities
- Separate firewall per network
- Built in storage
- Pre-configured for ease of use
- Possibility to support remotely
- File availability while offline
- Meets the highest environmental standards
- Made for use in marine conditions
- Developed and built in Germany

In direct response to the markets demand for cyber secure, hassle free data transmission to critical navigational equipment, the CT-Secure₄₆₀ has been developed to meet industry standards, respecting all facets of todays strict requirements in security. The unrivalled versatility of the CT-Secure₄₆₀ is an immense leap forward in the way ship owners protect their assets from cyber security threats
